

THE UNIFICATION GALLERY

The gallery covers the main events that lead to the foundation of the modern Saudi State by the late King Abdulaziz Al-Saud, beginning with the recapture of Riyadh in 1319 AH.

The gallery further illustrates King Abdulaziz efforts to unify the regions of the State and establish a Kingdom. Soon after, the efforts were put to initiating the State's various structures. The gallery offers some authentic material and models of buildings representing some of the Kingdom's towns and villages.

The gallery also features a documentary film, complete with audio-visual effects, about the different stages of the unification of the Kingdom of Saudi Arabia.
